                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The present sequence is a full-length cDNA encoding GmPK-3, a novel soybean protein kinase stress-related polypeptide (PKSRP). The cDNA was identified on the baais of homology to PNyscomitrella patens PK-3 (see ACC57962) and PK-10 (see ACC57966) sequence. GmPK-3 is an example of PKSRPB of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  New protein kinase stress-related polypeptide coding nucleic acid, useful for producing transgenic plants with an increased tolerance to an environmental stress, e.g. high salinity, as compared to a wild type
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     GmPK-3; protein kinase stress-related polypeptide; PKSRP; enzyme; transgenic plant; plant; stress tolerance; drought tolerance; salt tolerance; cold tolerance; soybean; gene; ss.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The invention relates to an isolated DWARF12 (DWF12) mutant polypeptide.

The mutant polypeptide comprises at least 70 % sequence identity to the amino acid sequence of the DWF12 polypeptide given in the specification to a positions 38-326 or 1-380, and having a mutation of at least one nonconservative substitution, addition or deletion of an amino acid in a cepton of the polypeptide corresponding to a region given in the specification. The mutant DWF12 polypeptide is useful in producing transgenic plants that display at least one altered DWF12 phenotype, such as altered blochemistry, structure or morphology. The transgenic plant can be used in plant breeding or directly in agricultural production or industrial applications. The polymedicetide is useful in isolating or creating other mutant cell gene alleles, in inhibiting or enhancing candogenous DWF12 gone expression, and in standard diagnostic assays as hybridisation probe or primer. This polymuclectide sequence represents the cDNA of the wild-type DWF12 locus of the invention
                                                                                                                                                                                                                                                                                                                                                                                     DWARF12; DWF12; transgenic plant; plant breeding; industrial application; agricultural production; gene; ss.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             New isolated DWARF12 mutant polypeptide for producing transgenic plants displaying altered biochemistry, structure or morphology which are useful in plant breeding, in agricultural production or industrial applications.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             196
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                255

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The invention relates to identifying a stress condition to which a plant cell has been exposed, comprising: (a) contacting nucleic acid arrepresentative of expressed polynucleotides in the plant cell with an array or probes representative of the plant cell genome; and (b) detecting a profile of expressed polynucleotides in the plant cell stress response. The method is useful in the production of transgenic plants, cells me method is useful in the production of transgenic plants, cells me method is useful in the production of transgenic plants contact and stress. The present sequence is that of an Arabidopais thaliana stress regulated gene (ABZ12196-ABZ17574) used in methods of the invention. Note: The sequence data for this patent is not represented in the printed specification but is based on sequence information supplied to Derwent by the European Patent Office
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   320
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              380
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       440
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        260
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Identifying a stress condition to which a plant cell has been exposed and producing plants with increased tolerance to these abiotic stresses.

This invention relates to a novel method for altering one or more plant characteristics. Specifically, it refers to identifying genes that are up cardown-regulated in transgenic plants overspressing the heterodimeric E2Fa/DPa transcription factor of Arabidopsis and using these sequences to alter plant characteristics accordingly. The present invention describes generating transgenic plants for the production of growth regulators, enzymes, therapeutics, pharmaceuticals and animal feed products, where the altered plant characteristics are selected from increased yield or biomass, enhanced survival capacity, siress tolerance, plant architecture or physiology, altered endoreduplication, biochemistry, signal transduction, storage lipid mobilisation and/or altered photosynthesis, cach relative to the corresponding wild type plants. Accordingly, these sequences can also be useful as positive or negative selectable markers during transformation of cells or tissues. The identified genes play a cole in a variety of biological processes such as DNA replication, ell wall biosynthesis, nitrogen and/or carbon metabolism or they function as transcription factors. This polynucleotide sequence is thale cress cDNA capacity.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              9

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present sequence is a full-length cDNA encoding BnPK-2, a novel canola protein kinase stress-related polypeptide (FKSRP). The cDNA was identified on the basis of homology to Physcomitrella patens FK-3 (see ACC57962) and FK-10 (see ACC57966) sequence. BnFK-2 is an example of PKSRPB of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                340
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              400
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         460

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ઠે
                                                                                                                                                                                                                                                                         The present sequence is a full-length cDNA encoding GmPK-1, a novel soybean protein kinase stress-related polypeptide (PKSRP). The cDNA was identified on the basis of homology to Physconitrella patens FK-3 (see ACC57962) and FK-10 (see ACC57966) sequence. GmPK-1 is an example of PKSRPs of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              315
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    375
                                                                                                                                                    protein kinase stress-related polypeptide coding nucleic acid, useful producing transgenic plants with an increased tolerance to an ironmental stress, e.g. high salinity, as compared to a wild type
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     195

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ò
                                                               The invention relates to protein kinases, especially calcium-dependent phosphorylase kinase (CDEK) and glycogen synthase -3 (GSK-3). The polypeptides having GSK activity can be expressed by standard recombinant methodology. The polymucleotides encoding the polypeptides are useful for isolating cDNAs and genes encoding homologous proteins from the same or other plant species, for immunological screening of cDNA expression libraries, and for creating transgenic plants in which the glycogen synthase kinase polypeptides are present at higher or lower levels than normally found. The polynucleotides are also useful as probes for genetically and physically mapping the genes that they are part of, and smarkers for traits linked to those genes that they are part of, and for altering the level of expression of GSK-3 in a transformed host cell. The present sequence represents a wheat GSK-3 CDNA

Fri

cc useful for immunological screening of CDNA expression libraries, and for useful for immunological screening of CDNA expression libraries, and for preparing antibodies against the polypetides, where the antibodies would be useful for detecting (I) in situ or in vitro, in cell extracts.

CC Nucleic acids (II) encoding (I) can be used to isolate CDNAs and genes can also be used for creating transgenic plants in which (I) is present at higher or lower levels than normal or in cell types or in developmental stages in which they are not normally found. (II) are useful as probes or primers. The polymucleotides may be used as probes for grainst for genetically and physically mapping the genes that they are a part of and used as markers for traits linked to those genes. The information can be used in plant breeding in order to develop lines with desired the present invention phenotypes. The preser the present invention 88888888888888888888888888

                                                                                                                                                                                                                                                                                            Sequence 1414, Application US/09016434

Sequence 1414, Application US/09016434

Patent No. 6500938

GENERAL INFORMATION:
APPLICANT: Janice Au-Young

APPLICANT: Janice Au-Young

APPLICANT: Officey J. Seilhamer

TITLE OF INVENTION: COMPOSITION FOR THE DETECTION OF SIGNALING

TITLE OF INVENTION: PATHWAY GENE EXPRESSION

NUMBER OF SEQUENCES: 1490

CORRESSPONDENCE ADDRESS:
ADDRESSE: INCYTE PHARMACEUTICALS, INC.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                . 9
